Project 1

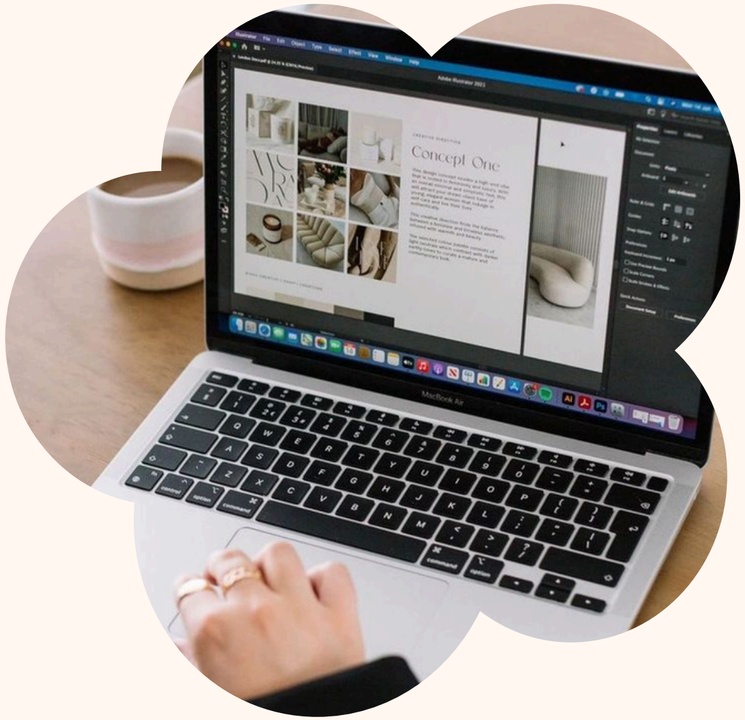
Project 1: Logo Design for a Start-up Company

This project involves creating a unique and memorable logo for a new start-up company. Leveraging skills in logo design and Illustrator, the project focuses on understanding the brand's identity and target audience to develop a visual symbol that reflects the company's values and mission. The process includes brainstorming concepts, designing several logo options digitally, and refining the chosen design for various applications such as business cards, websites, and social media profiles.

Project 2

Project 2: Social Media Campaign Design

The second project is centered around designing a cohesive social media campaign to enhance brand presence and engagement. Utilizing expertise in social media design, this project requires creating visually appealing posts, stories, and banners tailored for different social media platforms. The campaign will reflect consistent branding, attractive graphics, and clear messaging to capture the audience's attention and promote interaction, aligning with the designer's skills and current professional experience.



Best Work Samples

Here's my best work sample, and actually like a graphic designer who crafts creative and visually appealing designs. My work highlights vibrant illustrations and branding projects that effectively showcase products and engage viewers.
